

CANVASS THE CAMPUS

Providing Versatile Solutions
All Across Campus

**SPACES TO THINK, LEARN,
CREATE, & TRANSFORM.**

A functional and supportive environment is key for faculty and students to get the most out of their campus experience. Each department on campus provides specialized resources to its community, allowing them the space and tools they need to learn, grow, and succeed.

Whether you’re looking to transform existing spaces or design new ones, Spacesaver understands the complexities of planning for spaces that will be as useful 20 years from now as they are today. With 50 years of experience across hundreds of different applications, we offer storage and workspace solutions that will make every part of your campus more efficient, organized, and future-proof.

Spacesaver works closely with architects, designers, and campus administrators to continually anticipate the needs of the educational community. Here are some trends, challenges, and solutions we’ve been seeing in campus design.

- **ATHLETIC EQUIPMENT ROOMS** 04
- **LIBRARIES & MAKERSPACES** 06
- **OFF-SITE STORAGE** 08
- **FLEXIBLE SPACES** 10
- **MUSEUMS & ARCHIVES** 12
- **LABS & RESEARCH COLLECTIONS** 14
- **CAMPUS POLICE** 16
- **HEALTHCARE** 18
- **PERFORMING ARTS & RECREATION** 20
- **FACILITIES & MAINTENANCE** 22

ATHLETIC EQUIPMENT ROOMS

An equipment room is much more than a storage space; it's a recruiting tool and a way to ensure the safety and longevity of the equipment your program has invested in. Spacesaver works with your team to design a system that optimizes your space, increases access to equipment, and serves as a source of pride for your program — so you can keep your focus on winning games.

TRENDS

- » Expanding programs create space constraints, forcing equipment managers and rooms to be flexible and versatile
- » Prioritizing the mental health, safety, and overall wellness of athletes
- » Branding and style take a leading role in recruiting
- » Increased theft and loss force managers to improve laundry and gear exchange

CHALLENGES

- » Health and Safety
- » Loss Prevention and equipment damage
- » Recruitment, growth of programs and supplies
- » Inefficiency and lack of space

SOLUTIONS

- » High-Density Mobile Systems (HDMS)
- » Nantucket Drawers and Trays
- » 4-Post Shelving
- » Day Use Lockers
- » Pass-Through Equipment Lockers

LIBRARIES & MAKERSPACES

While many libraries have opted to downsize the number of physical volumes they keep onsite, there's still a need for storage. Spacesaver's compact storage solutions help keep resources accessible to patrons, while freeing up space for new amenities and uses. In addition, our Flexible Shelving can be equipped with casters to allow you to easily rearrange your stacks, creating custom-sized meeting and collaboration spaces on the fly.

TRENDS

- » Flexibility and variety to create the day's ideal configuration
- » A variety of spaces to learn, study, collaborate, and create while utilizing the latest technology

CHALLENGES

- » Maintaining access to collections
- » Pushback from faculty wanting books to stay onsite
- » Adapting space to fit the needs of today's students

SOLUTIONS

- » High-Density Mobile Systems (HDMS)
- » Cantilever Shelving
- » 4-Post Shelving
- » Nantucket Drawers and Trays
- » Day Use Lockers
- » Movable Walls
- » Flexible Shelving

OFF-SITE STORAGE

In order to make room for new functions, libraries are opting to pare back on items that don't circulate often, reduce duplicate copies, and offer digital versions whenever possible. Knowing that moving collections from libraries across campus to an off-site storage facility can be a major undertaking, Spacesaver has worked closely with dozens of institutions to create a more efficient off-site resource storage and retrieval system.

Spacesaver's high-bay storage solutions help free up space for new library services and amenities while providing an optimal storage environment for books and archival collections at a lower cost-per-volume.

TRENDS

- » Categorized and accessible storage of additional volumes
- » Archived documents designed to create increased flexible space on campus

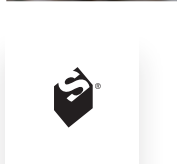

CHALLENGES

- » Space utilization and organization
- » Access to materials
- » Secure transport of materials

SOLUTIONS

- » High-Bay
- » XTend®
- » High-Density Mobile Systems (HDMS)
- » 4-Post Shelving
- » Day Use Lockers

FLEXIBLE SPACES

In varying scales across campus, flexible spaces are being implemented to reduce underutilized areas. These agile and versatile solutions are designed for academic, living, and social use, giving schools a way to develop futureproofing strategies and students a diverse set of spaces to maximize their higher education experience.

TRENDS

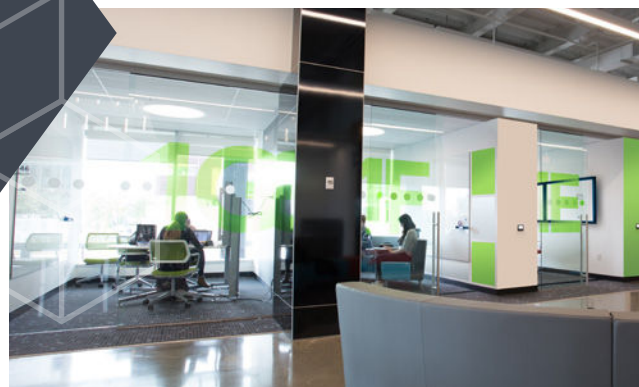

- » Creating multi-purpose spaces including areas for collaboration, public display, socialization, academics, and more
- » Adaptive reuse of facilities to reclaim unused or underutilized spaces
- » Transitioning from highly specialized, single-purpose facilities to interdisciplinary spaces that can be reconfigured based on needs and funding

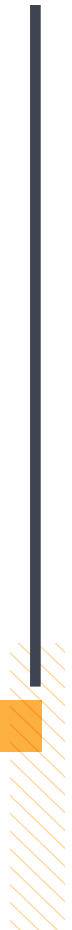

CHALLENGES

- » Reducing single-purpose use facilities
- » Flexibility and functionality
- » How to design for unknown future use

SOLUTIONS

- » High-Density Mobile Systems (HDMS)
- » Day Use Lockers
- » Movable Walls
- » Pass-Through Lockers

MUSEUMS & ARCHIVES

For campus museums, galleries, and archives, preservation and protection are of utmost importance. The collections they house are not only physical evidence of our past, but they are also tools that will be used to teach students learning to properly maintain these and other collections for the future.

To aid in educating future curators, Spacesaver offers a full line of preservation-grade museum cabinets, compact storage, and art racks designed to help protect and organize any type of collection.

TRENDS

- » Providing environments where the curators of tomorrow can learn to preserve and protect collections
- » Expanding visibility of a greater percentage of collections, both on display and in storage
- » Increasing collections, accountability, organization, and process

CHALLENGES

- » Organization
- » Efficiency
- » Optimal preservation environments
- » Space utilization

SOLUTIONS

- » Preservation Cabinets
- » Nantucket Drawers and Trays
- » High-Density Mobile Systems (HDMS)
- » 4-Post Shelving
- » Modular Art Racks
- » Cabinets with Casters

LABS & RESEARCH COLLECTIONS

The last decade has seen an almost 50% increase in students getting degrees in STEM-related majors. In order to keep pace, campuses are increasing their investment in STEM-oriented laboratories and research spaces to recruit students and faculty. Spacesaver's line of versatile storage cabinets and accessories are designed to keep lab supplies and chemicals secure, organized, and properly ventilated.

TRENDS

- » Flexibility to store materials of all sizes, composition, and value
- » Accessibility to allow for more time to test and measure
- » Efficiency to safely store and access more supplies

CHALLENGES

- » Reducing loss prevention and equipment damage
- » Recruitment
- » Space Organization
- » Expansion of programs and supplies

SOLUTIONS

- » High-Density Mobile Systems (HDMS)
- » Preservation Cabinets
- » Nantucket Drawers and Trays
- » 4-Post Shelving
- » Day Use Lockers

CAMPUS POLICE & SAFETY

Whether it's providing game day security, monitoring campus road and foot traffic, or ensuring your personal items are protected all over campus, safety on campus is paramount to a school's reputation. Campus Police & Safety departments have the same needs as a municipal police department, including solutions for personal gear, evidence, and weapons storage. Spacesaver provides options that are specifically designed to support campus police officers and departments in securing varying weapons and evidence inventory of all sizes.

TRENDS

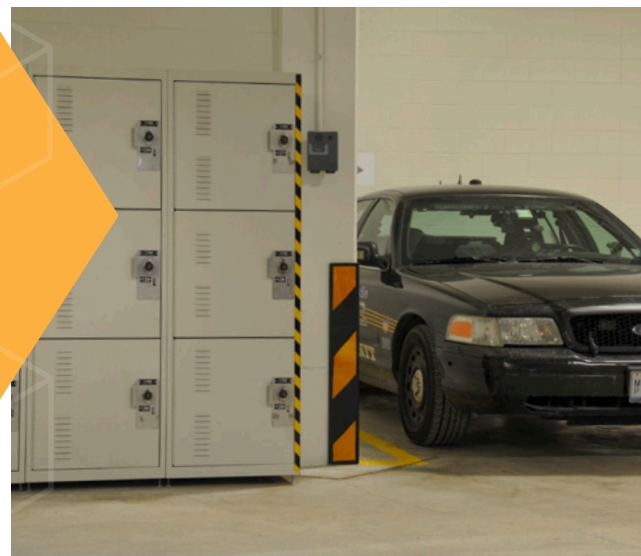

- » Recruitment and retention of students can be directly affected by campus safety
- » Increasing readiness and accessibility for emergency situations

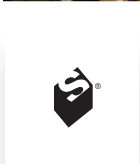

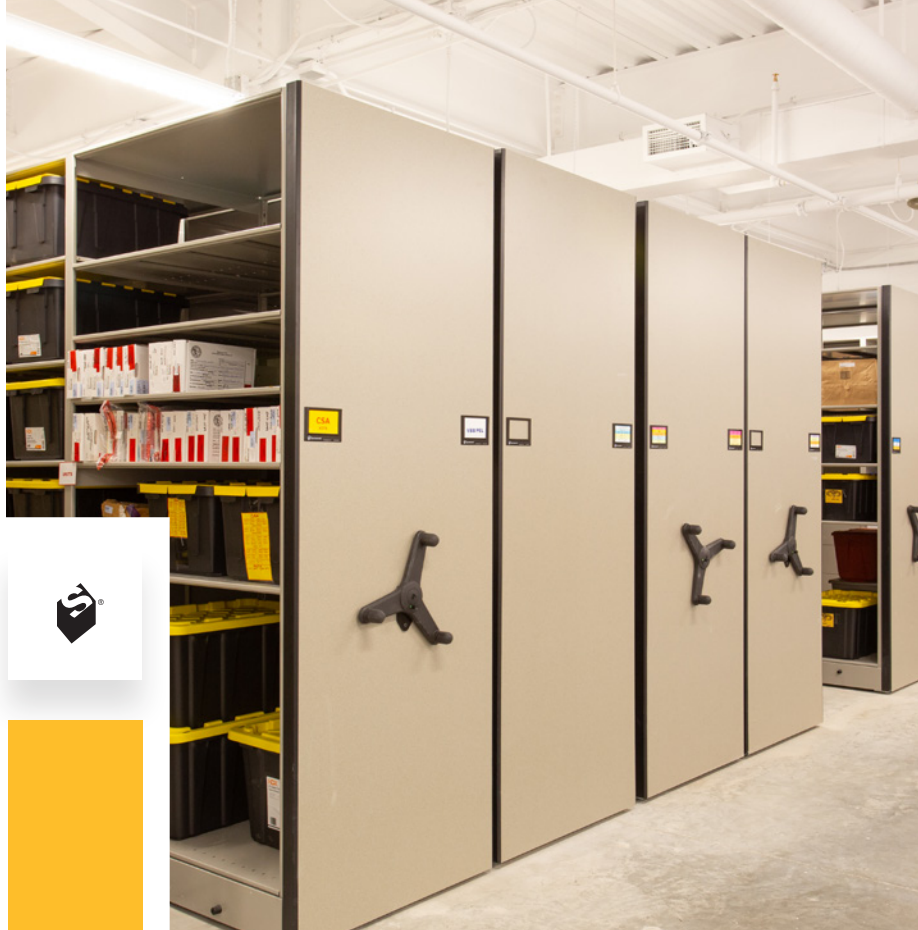

CHALLENGES

- » Preserving evidence chain of custody
- » Secure storage and preservation of equipment and supplies
- » Recruitment and retention of officers

SOLUTIONS

- » High-Density Mobile Systems (HDMS)
- » Evidence Lockers
- » FreeStyle Lockers
- » Universal™ Weapons Rack (UWR®)
- » 4-Post Shelving

HEALTHCARE

University hospitals and on-campus healthcare clinics treat hundreds of patients every day. Having quick access to sterile supplies allows staff more time with those patients, a factor directly tied to improving outcomes. Spacesaver's mobile systems help centralize sterile supply, reducing storage space and making cleaning a breeze. Customizable bin systems can be integrated into the systems and are perfect for pharmacies and supply storage on separate floors.

TRENDS

- » Expanding access to healthcare facilities on campus
- » Increasing profitability and preparedness
- » Improving patient outcomes and the health and wellbeing of staff

CHALLENGES

- » Physical and mental health of students and faculty
- » Finding space on campus for new or updated clinics
- » Improving organization and efficiency
- » Security of belongings

SOLUTIONS

- » High-Density Mobile Systems (HDMS)
- » Nantucket Drawers and Trays
- » 4-Post Shelving
- » Day Use Lockers
- » Modular Bin Storage

PERFORMING ARTS & RECREATION

From costumes and props to instruments to sheet music libraries, these assets are a valued part of any institution's programs, and proper preservation techniques are key to their longevity. Spacesaver offers an array of storage solutions for keeping performing arts assets protected and organized. This goes the same for campus recreation centers, intramural athletics, and outdoor adventure gear. Spacesaver's systems allow managers to store equipment efficiently while allowing staff to quickly find what they need.

TRENDS

- » Transition to digital sheet music and scripts
- » Increased storage of instruments and equipment on site
- » Growing interest in the fine arts
- » Providing a diverse set of productions and equipment

CHALLENGES

- » Flexible storage of items of varying sizes
- » Controlling access for users
- » Inventory control and loss prevention

SOLUTIONS

- » High-Density Mobile Systems (HDMS)
- » 4-Post Shelving
- » Nantucket Drawers and Trays
- » Day Use Lockers

FACILITIES & MAINTENANCE

Facilities teams have a hand in the functionality of every building on campus, from short-term operations to long-term planning. In addition to storing supplies for daily workflows, facility managers also maintain an inventory of spare flooring, ceiling tiles, furniture, and other replacement parts. And when supply chain constraints create challenges, storage of cleaning supplies and PPE require space as well. Spacesaver's ActivRAC® mobilized storage systems allow you to fit more into your warehouse and make it easier to find and retrieve what you need.

TRENDS

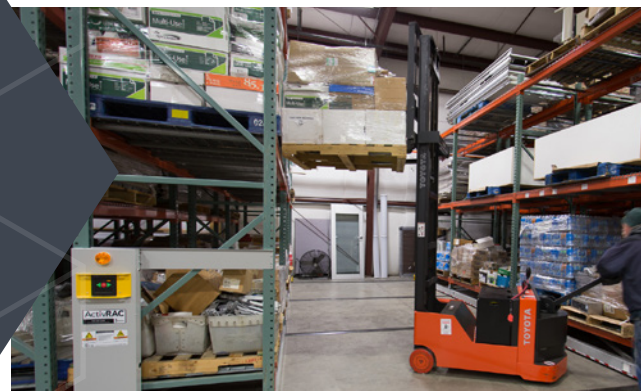

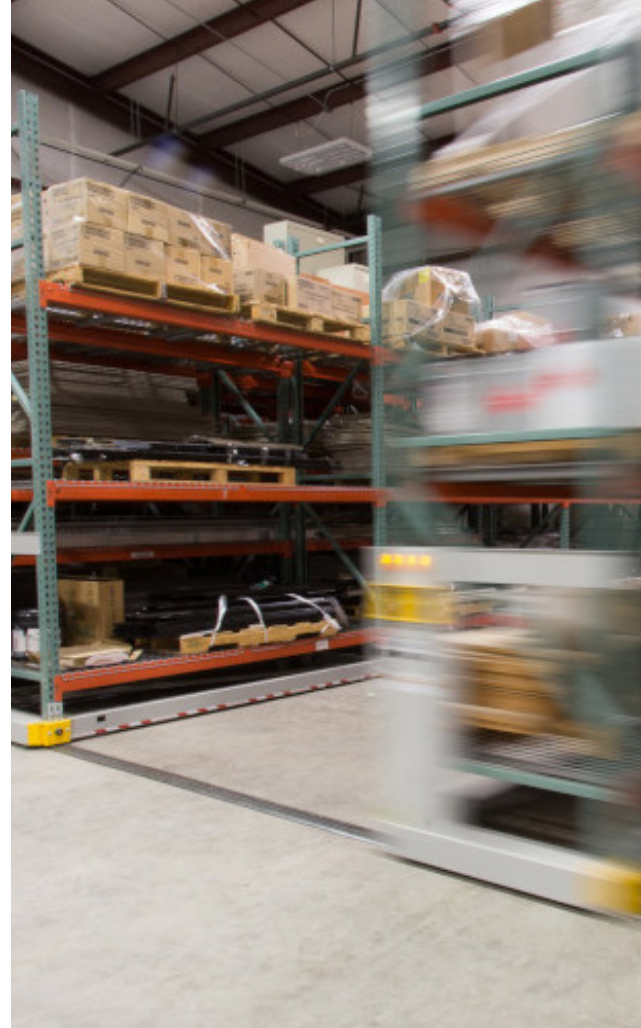

- » Accessibility to supplies
- » Inventory control in warehouse
- » Secure and portable solutions
- » Preparedness

CHALLENGES

- » Space organization and efficiency
- » Safety of employees
- » Flexibility for storage of items of varying sizes
- » Systems needing to be upgraded
- » Supply chain

SOLUTIONS

- » ActivRAC®
- » High-Density Mobile Systems (HDMS)
- » 4-Post Shelving
- » Half-Height Mobile Workstations
- » FreeStyle Lockers

THE DESIGN PROCESS

Early Involvement:

While storage is often an afterthought, the earlier you involve us in your project, the better we're able to ensure we get you the perfect setup for your space, needs, and timeline.

Space Assessment:

After you reach out, one of our certified local distributors will meet with you for a complimentary consultation to assess your current space, understand your challenges, and get started on a plan.

Design:

Our design and engineering teams at Spacesaver will work with you and your local consultant to design "the perfect solution for your project and goals."

Customized for Your Space:

In addition to our standard products, engineered-to-order solutions account for around half of the projects we work on! Depending on your project, we offer dozens of options for finishes, looks, and configurations so you get exactly what you need for your campus.

Installation & Maintenance:

Once we've manufactured and shipped your solution, your certified local team will install around your schedule. They're also available for ongoing questions and maintenance support.

SUSTAINABILITY COMES STANDARD

We know sustainability is key to your mission, and it's integral to ours, as well. We use non-off-gassing materials to protect indoor air quality, manufacture products using steel that contains 89% recycled content (and it's fully recyclable at the end of its life cycle!), and create quality products designed to be with you for the long-haul. After all, the best sustainability strategy is to reduce consumption overall. Many of our products can also help contribute to LEED® Certification.

MADE IN THE USA

All of our products have been proudly designed, engineered, manufactured, and shipped from our facility in Fort Atkinson, Wisconsin since 1972.

CONTRACTS AVAILABLE

We offer a number of state and national contracts to help streamline the procurement process, including Equalis Group, Sourcewell, and Omnia. Contact us to learn more about what purchase contracts are available for your project.

50 Years of Expertise Backed by a Nationwide Network of Local Support

Spacesaver's extensive network of local distributors employs design consultants, sales specialists, and service technicians who are ready to help design, install, and maintain any campus project, no matter its size or scope. Our distributors often act as liaisons between our clients and their architects and interior designers, providing assistance regarding floor loading, architectural constraints, building codes, and a wide range of other concerns. From complimentary space assessments, to project design and coordination, to product installation and ongoing service, our storage experts pride themselves on exemplary customer service.

Get started transforming your campus. We're here to help.
