Robust Solutions

HAMILTON has decades of experience delivering labs, classroom cabinets, lockers and mailrooms to schools and universities. We know what works.

Utilizing our unique flexible manufacturing techniques and the most contemporary materials available on the market, we can produce a research and learning environment that is tailored to your needs.

Engaging Spaces

HAMILTON labs are safe, innovative, attractive spaces that seamlessly accommodate technology.

- Ultra chemical-resistant and Class 1/A Fire Rated phenolic resin work surfaces
- Non-permeable powder-coated or stainless steel kickplates
- Built-in raceways for electricity and plumbing
- Integrated RO water, air, gases, vacuum and sinks
- Cabinets sized to house specialty items like microscopes and chemicals securely

HAMILTON lockers protect valuables and optimize available space.

- Wide range of choices in key and pad locks as well as the latest in digital lock technology
- Traditional school colors available for finishes and surfaces
- May be reconfigured and expanded in response to growth or moves
- More upscale presentation than typical metal lockers

HAMILTON Solutions at Work

Harvard University's student mailroom features HAMILTON's freestanding modules. Because the mailroom is located in a high profile area on the first floor, Harvard specified a wood veneer finish.

Hamilton Casework Solutions offer GREENGUARD Gold certified products to provide safe, quality, environmentally friendly workspaces. FSC and OSHPD certified components are also available as specified by a designer.
